

Native Chinese Speakers Needed!

Chinese Reading Study:

A study on Chinese word segmentation

Description:

The study explores how native Chinese speakers process words in reading. In this study, you will read and segment 48 short Chinese sentences. Also, you fill in a survey on how much you agree a word can be segmented. You will complete the tasks fully online on your computer.

Estimated time of study: 30 minutes

Compensation: 5 U.S. dollars

*Note that you must provide information of a valid Zelle account to receive the payment.

*If you cannot provide information of a Zelle account but are willing to participate voluntarily without payment, we welcome and greatly appreciate your kind help.
