

## **Rotation Schedules**

We would prefer for students to have shared experiences within and among the classrooms. For this reason, we want to ensure that students are rarely working independently in a classroom without his or her peers, and that students are getting time in each of the cooperating teachers' classrooms.

Due to rotation schedules, it may be possible that a cooperating teacher may not have a group of pre-service teachers in his or her room during a time period, and this is acceptable.

During the full-time placement (weeks of 2/26, 3/5, 4/9 and 4/16), students will need to rotate among the classrooms as needed for their teaching/ coursework expectations and to complete assignments within certain parameters. Some assignments may require all pre-service teachers on the team to work in one room together at the same time.

Below are some examples of rotation schedules. Please use these examples to create a rotation schedule that works best for all involved. Most teams will have four students with two to three cooperating teachers.
